SLI test on aerospike engine technology successful

Stennis Space Center, Miss., has successfully completed a critical initial test in a three-part series for a Space Launch Initiative (SLI) test program of the Electro-Mechanical Actuator technology used on the former X-33 program's Linear Aerospike XRS-2200 flight engine set. Thursday's test was a "start-sequence" test that went the full scheduled duration of 5.32 seconds. Marshall is NASA's lead center for SLI.

Family Fun Day meal tickets go on sale Wednesday
